Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

a. The specification is missing section headings, such as "Brief Description of the Drawings".

b. The specification includes many grammatical errors, such as page 4, line 9, "do" should be --does--. The entire specification should be reviewed and all grammatical errors should be corrected.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims include limitations directed to a mechanism for unwinding of the cutting filament and to the mechanism being replaceable. The disclosure merely discloses the existence of a mechanism for unwinding the filament and three top sections of a housing. The top sections either have a button on top, a bump button on the bottom or nothing. The disclosure does not

describe how the mechanism for unwinding the filament interacts with the filament bobbin or is connect to the top button or bump button. The disclosure does not describe the structure that makes these top sections interchangeable.

The claims will be examined on the merits as best understood in light of the rejection above.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Pittinger, Sr. et al. 4,702,005.

Pittinger discloses a trimmer head (Figs. 17-19 and 25) including a housing having:

- a top section (includes 121)
- a lower section (includes 44)
- a bobbin (180)
- a mechanism for unwinding

The mechanism for unwinding includes a manual mechanism (includes cable 165), a semiautomatic mechanism (includes bump button 161) and an automatic mechanism (125). These mechanisms can interchanged (Column 15, lines 25-29).

Regarding claims 5, the button is considered to be the lever 157.

Regarding claim 6, the hub is considered to be 161.
